

Writing - Compound Words

A compound word is where two or more root words are merged into a new and different word. There are three different kinds of compound: open, closed, and hyphenated compound words. With this knowledge, complete the following task, using the list beneath the word 'break' as an example:

# Compound words

GRADES 5 & 6

**Instructions:** How many new compound words can you create using these base words?

break:
<i>breakup</i>
<i>breakthrough</i>
<i>daybreak</i>
<i>breakfast</i>
<i>outbreak</i>
<i>windbreak</i>

come:
-------

through:
----------

some:
-------

make:
-------

every:
--------

back:
-------

over:
-------

men:
------

## Mathematics – Division

Take a look at the following video that outlines the steps and language used for teaching division using the traditional method. The method has an emphasis on renaming and place value:

<https://www.youtube.com/watch?v=1r7FFUJfcbo>

Now have a go at the following problems:

# DIVISION

$3 \overline{)12}$

$6 \overline{)36}$

$4 \overline{)20}$

$9 \overline{)27}$

$7 \overline{)21}$

$8 \overline{)16}$

$5 \overline{)35}$

$7 \overline{)49}$

$3 \overline{)24}$

$2 \overline{)4}$

$9 \overline{)63}$

$6 \overline{)6}$

$6 \overline{)24}$

$4 \overline{)32}$

$8 \overline{)72}$

$4 \overline{)369}$

$3 \overline{)188}$

$2 \overline{)126}$

$5 \overline{)205}$

$7 \overline{)561}$

$5 \overline{)305}$

$7 \overline{)147}$

$8 \overline{)249}$

$9 \overline{)547}$
